Our approach to legal and tax advice

It is the right of every client to have a claim on optimal advice, customized solutions and expertise. We realize this claim. Therefore, we offer more than correct answers to legal and tax matters. Whether for small businesses, medium-sized businesses, entrepreneurs, companies from the public sector, companies in establishing phases or individuals, we always provide appropriate legal and fiscal results at national and international level.

In our advice, we place great value on a long-term and cooperative collaboration. We offer our clients not only first-class technical know-how in the areas of civil, business and tax law, but also fast response times, cost transparency and all-round advice.

We keep our clients not only from legal and tax risks, but show them the safe legal way to take full advantage of the opportunities offered by our advised business opportunities for the development of their companies. If we timely recognize legal reservations, we look for legally compliant solutions. Our communication with our clients is always in a clear and unambiguous language.

Through many years of advisory activity, we have extensive practical knowledge in civil, commercial and tax law. Especially in situations where court intervention is required, our clients trust our advice in a special way. We draw from our vast experience and extensive expertise which we have acquired in many court cases. The interdisciplinary cooperation with tax advisors and auditors is not only at the top of the agenda, but our everyday work.

Personal contact with our clients is a major concern for us. Our clients can always depend on getting highly professional legal and tax advice from our law firm - we are your reliable partner.
